

## KinderConnect Release Notes

Version: 2.0.7.15

SPR #	State	Problem	Solution
<b>Standard Fixes</b>			
43304	NY		Modified the behavior of the Attendance page when the user enters a Time In and Time Out pair that is are same time. The cell turns red, and attendance cannot be submitted until this is corrected.
43405	NY		Modified the system to only create one payment in CCTA if the child has authorizations in multiple programs.
44132	NY		Corrected an issue where, under certain circumstances, submitted attendance was not locked and could be modified while in a submitted status.
44193	NY		Modified the steps needed to print a report. Now, when the user selects the report they want to run, the system automatically brings up the parameter screen for the report. The user can enter the parameters and view the report.
44197	NY		Modified the Attendance page to all a user to move from, and save, cells where incorrect data entry of attendance causes the cell to turn red.
44204	NY		Modified the Attendance page so that the navigation bar is always displayed at the top of the page.
44451	NY		Added report version numbers to the footer of reports/forms printed from the portal
44527	NY		Users can no longer enter attendance times for the same day where the time is greater than the current time. For example at 2:00 PM on 6/1, you cannot enter a time in or time out of 3:00 PM on 6/1.
44531	NY		Optimized the stored procedure used on the Sponsor search page.
44566	NY		Corrected an issue that, in certain situations, caused the system to generate an error when clicking on the History link on the Attendance page.
44894	NY		Providers are now required to enter time in and time out pairs, representing the time they are claiming, whenever they select an entry other than 'Not Scheduled' from the Absent dropdown. These times will be used by CCTA when calculating a payment.  If a provider knows that they are not paid for absences, there is no need to mark the day as absent.
44925	NY		Modified the system so that the most recent provider name is what prints on reports from the portal.

## Version: 2.0.7.15

SPR #	State	Problem	Solution
44936	NY		Modified the Daily Attendance Details report so that the provider has the option to print it per family, with signature lines per child.
45017	NY		Implemented a new Provider Message page. This page displays a message from the local district if attendance has been returned to the provider for correction. Please see the user guide for more details.
45018	NY		Added a new Provider Payment page that displays payments Paid in CCTA, along with the amount.  NOTE: The system will only display payments for the May 2012 billing cycle and beyond.
45019	NY		Added a new page that displays case information for a family. Please see the user guide for more details.
45023	NY		Added the ability to enter a note when submitting attendance. This note shows up in the alert queue for the Payment Technician assigned to the provider.  Added the ability to Recall attendance that was submitted in error, or needs to be corrected. Please see the user guide for more details.
45025	NY		Added a new Provider Rates page. This page displays the rates on file at the local district. Please see the user guide for more details.
45078	NY		Implemented various changes to the layout and format of the Attendance page. This was done to increase the amount of information that can be displayed at one time.
45120	NY		Modified the Operator Search results to display all locations that an operator is attached to.
45207	NY	In certain situations where children had authorizations in two different programs, with different but overlapping dates, at the same provider, CCTA would not create any payments after the provider submitted attendance.	Corrected an issue with the stored procedure used for creating payments for submitted attendance.
45377	NY		Corrected an issue that, in certain situations, was causing duplicate data to show on the Daily Attendance Details report.
