## KinderConnect Release Notes

Version: 4.2.9

SPR #	State	Problem	Solution
<b>Standard Fixes</b>			
59203	NY	In the last release, at the request of several districts, all Absence codes in KC that were not mapped to an Attendance Code in KT were removed. For most districts, that meant removing the Not Scheduled absence code which was special to KC in that it did not require times be entered.	The Not Scheduled option has been entered back into KinderConnect. Providers can select it and not have to enter times. This will work like it did prior to the last release.

## KinderTrack4-NY Release Notes

## Version: 4.2.9

SPR #	State	Problem	Solution
<b>Standard Fixes</b>			
21014	NY		Modified the system to enforce a business rule that usernames must be unique. No two users can have the same user name.
45542	NY		Corrected an issue on the Provider > Rates > History screen. This screen will now display rates for the 6-12 Age Category.
47173	NY	There are times when a worker will enter the incorrect effective date on the notice page. Depending on what date they enter, it may cause a system error.	Modified the page so that if an effective date is entered that is before 1/1/2000 or more than one year in the future, the system will clear the date field so they can enter a new date.
47418	NY		Modified WPI 2004: Duplicate Provider Name so that it will now only fire if there is a provider with the same name in that district.
47465	NY		Corrected an issue where, in some instances, selecting an alert to be processed does not ask to take you to the associated page.
47962	NY	When creating a notice, if the office location has two lines, while the notice is in Pending status it only displays one line. Both lines are there when the notice is authorized and printed.	Corrected an issue with the data shown while a notice is in pending status.
47963	NY		Modified the system so that office locations that are set to Inactive no longer show as options for operators or when creating a Notice.
50324	NY	If an Additional Fee is entered without an end date, the Notice page shows the default date of 1/1/2014.	Modified the Notice page to display a blank if the Additional Family fee end date is blank.
52607	NY	If a district enters an Additional Family Fee that has a long name, the name is cut off on in the Payment Summary grid on the payment page.	Corrected an issue with the stored procedure that returned the name. It will now correctly display the name entered on the Additional Fees page.
54988	NY		Added a QRC "Adding a New Operator to KinderTrack" to the Help section of KinderTrack.
58373	NY	Legally Exempt Family and Legally Exempt In Home providers are not allowed to provide care for children eligible under Title XX programs. When importing new providers from WMS, the system automatically checks all programs when creating the Provider Profile.	Modified the CSOS import to exclude Title XX programs when setting up the Provider Profile for Legally Exempt providers created from the import.
58529	NY	If a user was assigned only one role, and that role did not have permission to access the Home page, the system would generate an error.	Modified the Roles page to always give access to the Home page for any new role created.
59105	NY	WPI 2018 would fire incorrectly fire if the Override Weekly Limit checkbox was checked.	Corrected an issue with the WPI logic.
59134	NY		Corrected an issue where notes added to a Rejected payment were also displayed on payments for the same child and provider.

## Version: 4.2.9

SPR #	State	Problem	Solution
59143	NY		Added the ability to turn off the alert for Provider Submitted Attendance. This has been added to Admin > Alerts > Payment Alerts.
59148	NY		Modified the CCFS Facility Lookup on the Provider page. It now returns the Program Type in the results.
59149	NY	For schedules and payments at legally exempt providers, CCTA needs to send over parent and child information. If the system does not find parent or child information as of the start date of the schedule or payment, it displays an error message.	The error message has been modified to include the fact that the error may be caused by the system not finding a parent designated as the "primary".  "Cannot Save Data. The system could not find parent/child information effective on the start date of the schedule or no Primary Parent record was found."
59156	NY		Parent and Child pages will now enforce the formatting of the CIN number. CIN numbers must be in the format AA#####A.
59157	NY		Corrected an issue where notes created when a payment fails the CCFS check were displayed on other payments for the same child and provider.
59158	NY		Created new, user friendly, error messages that are displayed when either:  1. There is an internal error on the CCFS side of the interface 2. The connection to CCFS cannot be made
59171	NY		Corrected an error in the payment calculator that would, in rare cases, cause an 'arithmetic overflow error'.
59242	NY		Modified the Notice page so that it now displays all active children as of the effective date of the notice. This will allow districts to create Recertification notices even if the family has not chosen a provider.
59243	NY		Modified the CCFS interface to use the CCFS ID as of the schedule or payment start date.
