

## KinderConnect Release Notes

### Version: 2.0.19

SPR #	State	Problem	Solution
<b>Standard Fixes</b>			
49210	NY		Added a new dropdown field labeled Contract Type on the Attendance > Enter page. This field allows the page to display attendance for All Children (Default), Subsidized Children or Full Cost Children.
50662	NY		Modified the Hours column of the Daily Attendance Details report. It now displays Hours and Minutes (9:30) instead of fractions (9.5) to be consistent with the other screens and reports that display Hours of care.
54981	NY		On the Attendance > History screen, removed the "-Present" from Time In and Time Out entries, and removed "Absent -" from any recorded Absences.
54982	NY		Added a new field labeled Foreign Key to KC Operator Detail screen. This field may be used in the future to link operators in the system to operators in external systems.
55060	NY	Due to the way that Spanish dates are formatted (mm/dd/yy vs dd/mm/yy) if a day of the month is greater than 12, switching back and forth between the pages causes a crash.	Corrected an issue with the way pages handle date formatting.
55272	NY	When running the Daily Attendance Detail report with the Only Submitted option, the report header displays: Attendance Detail - Provider - All Attendance.	Corrected an issue with the report. It now shows Attendance Detail - Provider - Only Submitted when that option is used.
55291	NY	If a day has multiple time pairs, any notes that are entered for the day show up multiple times on the Daily Attendance Detail Report.	Corrected an issue with the report so that it only prints one note per day.
