KinderTrack4-NY Release Notes

Version: 4.2.15

SPR #	State	Problem	Solution

Parameters

Product = KinderTrack4-NY

Standard Fixes

SPR #	State	Problem	Solution
63531	NY	On the Family > Needs page, if you enter an invalid State code, the system displays an Unhandled Exception error.	Added a business rule to the Parent Needs page to ensure a valid State Code is entered.
63860	NY		On the Family page, added a new flag Priority Payment. When this flag is set, operators can search for families with this flag set on the Payment Search page (see SPR 63865)
63861	NY		Various changes on the Child page: Added a new field Suffix. This child identifier maps to the New York City legacy system. It will not be used upstate. Added a new field DOE ID. This child identifier maps to the New York City legacy system. It will not be used upstate. Added a new child flag Stop Payment. When this flag is set, as of an effective date, payments for this child cannot be set to Paid status.
63863	NY		Modified the name of the Payment Prohibited flag. It is now Payment Days Prohibited. The functionality of this flag has not changed. When set, the system will not pay for any days on/after the effective date of the flag. For example if this flag is set effective 2/15/17, the system can pay for days up to and including 2/14/17, but will not pay for days 2/15/17 forward. Added a new provider flag called Stop Payment. When this flag is set, the system will not allow payments where the billing cycle intersects with the effective date to be set to Paid status. Operators can search for providers with the Stop Payment flag set on the Payment Search page (see SPR 63865).

Version: 4.2.15

SPR #	State	Problem	Solution

Parameters

Product = KinderTrack4-NY

SPR #	State	Problem	Solution
63865	NY		Added dropdowns on the Payment Search screen for "Priority Payments" and "Stop Payment". There are three choices: **Priority** Blank - the system will return results regardless of whether the Priority flag is set or not. Only Priority Payments - the system will only return results if the Priority flag is set. Exclude Priority Payments - the system will only return results where the Priority flag is not set. **Stop Payment** Blank - the system will return results regardless of whether the Stop Payment flag is set or not. Only Stop Payments - the system will only return results if the Stop Payment flag is set. Exclude Stop Payments - the system will only return results where the Stop Payment flag is not set
63866	NY	For varying schedules, the Payment screen defaults every day in the billing cycle to Present. If the child only attends Monday - Friday, payment staff need to change Saturday and Sunday to Not Scheduled.	On the Payment page, added a checkbox labeled Sat/Sun Off. By default, this box is not checked. When checked, Saturday's and Sunday's in the current payment are set to Not Scheduled automatically. Filling attendance will skip over these days. If there is attendance already entered for a Saturday and/or Sunday, it will be removed when this checkbox is checked.
63913	NY		Corrected an issue on the District Setting page that caused an error if "0" was entered for the Non-Traditional percentage.
63945	NY		Corrected an issue with WPI # 2024 (Age Exceeds System Age Limit) that would cause the WPI to fire even if the child's age did not exceed the limit.
63975	NY		Updated the After Hours fields in the Summary Rows on the payment page. The page now correctly displays hours after 7PM and before 6AM.
64058	NY	Under certain situations, the system would not automatically generate a Recertification Notice.	Corrected an issue with the stored procedure that checked the family status when determining if the notice needed to be created.
64132	NY		Corrected an issue that would cause an Unhandled Exception error when changing the Effective Date on the Provider Profile page.
64251	NY		Modified the nightly Auto Calculation routine for Nassau County to ensure that records are sorted in chronological order before being calculated.

Version: 4.2.15

SPR #	State	Problem	Solution

Parameters

Product = KinderTrack4-NY

SPR #	State	Problem	Solution
64300	NY		Modified the following fields so that they capture data from WMS: Homeless Modified the CCTA field to be a dropdown with choices Yes, No, blank. Initially the WMS field is blank. Yes or No is only set if that is what comes from CSOS. Military Added a selection for Not Military. Initially the WMS field is blank. Only set Not Military, Active Military or Reserves / National Guard if that is what comes from CSOS. Special Needs Add system child flag for No Disability and Child Disability Code - Not Applicable. Modified the label of the existing Special Needs flag to Child Has a Disability. Initially WMS field is blank. Only set No Disability, Child Disability Code - Not Applicable or Child Has a Disability if that is what comes from CSOS.
64355	NY		On the Provider > Payments page, added a column to the right of the Check Number field called Transmittal. This field is used by New York City ACS only. Upstate districts can hide this column using the grid Options button.
67010	NY		Added a read-only field Tax Payer Name to the Provider page. This field will only be used for New York City providers, and will contain data imported from their legacy system.
67011	NY	If the CCFS server is not available, KinderTrack displays a generic "Error 500" when invoking the CCFS web service. Since the server is not returning any data, the system cannot display any specific information.	Modified the error message so that it is more descriptive: "We apologize, but an error occurred while handling your request. We are working on the problem, so please try again a little later. Thanks for your patience! If this issue persists, then you should contact the CCTA Support Center at 877-369-6106 option 9, or support@controltec.com"
67012	NY		Added a night run job to automatically inactivate users who have not logged in for a specified period of time. Initially, this will be set to 9 months.
